## Organizer: The Iranian Petroleum & Energy Club

### Introduction

Iranian Petroleum & Energy Club aims to promote efficiency and sustainable growth in Iranian energy sector by providing demand led policy advice based on professional experience and frontier research. As a professional and nonprofit association, we facilitate knowledge transfer to hundreds of energy executives and young entrepreneurs which help them better understand the financial and management issues that shape the current energy environment in Iran. In collaboration with our network of professional executives, leading academics and field experts, we provide impartial and evidence-based policy recommendations for decision-makers in the energy sector; recommendations which have been successful in addressing some of the most entrenched challenges of Iranian energy sector.

We follow out our missions by forming specific workgroups to perform needed researches and to provide specific and general consultancy to these sections and provide strategy, solutions and also to hold strategic meetings, conferences and congresses. We fit to evaluate the issues from a strategic view, to observe, track and to analyze important and influential events in national, regional and global levels.
